

Digital Publishing Course Outline for iPad and Android

Duration: 2 Days

Related Courses:

Indesign, InDesign Adv, Design Principles

Course Overview and Objectives

This course is crafted for InDesign users who would like to use the new interactive rich media features in InDesign CS5.5, for publishing to the iPad and Android and other digital tablets. We will explore the interactive features on offer and look at the design principles that govern this format as well as the file organisation that is essential to successful publishing to digital tablets. This course covers more than converting your files to PDF. Create interactive content with the Overlay Creator and Folio Builder for iPad, Android, and BlackBerry PlayBook tablets. This course covers building interactive content up to the point of generating for local delivery to tablet devices.

Pre-requisites:

An intermediate understanding of InDesign and graphic design.

The Digital Publishing Design Workflow

- Overview of the DPS system and setting up the DPS InDesign tools
- Design considerations and storyboarding
- Assembling assets
